

Sooth.fyi

The only internet search engine designed for students

Individuals who learn using web search develop deeper, more unique knowledge structures than when consuming AI-generated summaries.

Read the research [here](#).

Key Features

Curated, High-Quality Sources

Thousands of the internet's highest quality sources of news, research, data, and insights

Zero Distractions

No ads, no AI chatbots, no dubious sources, no echo chambers

Zero Paywalls

Read paywall-free *Business Insider, The Washington Post, Foreign Policy, MIT Technology Review, Christian Science Monitor, The Nation, The New Republic, Project Syndicate*, and many more

Information Literacy Tools

NewsGuard Reliability Ratings and AllSides Media Bias Ratings to promote critical thinking and source evaluation skills. One-of-a-kind Misinformation Toolkit

Enhanced Research Support

Organized interface layout for efficient discovery. Peer-review search filter; built-in citation and Works Cited generator, and leveling tool for more efficient research and learning

Collaborative Features

Create and share research collections and bookmarks, enabling collaboration and transparency throughout the research process

Privacy and Compliance

Fully COPPA & FERPA compliant. Member of Student Data Privacy Consortium

Easy and Secure Implementation

Web-based application with no technical setup required. Multiple single sign-on options and accessibility across various devices
